● Biography

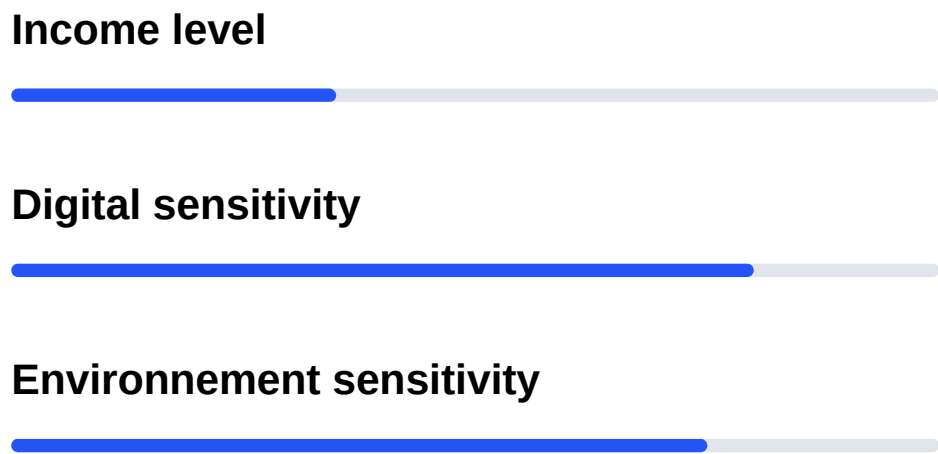

I started to start an interest in IT development when I was community manager.
I had to take care of their website besides taking care of social networks, that's when I wrote my first lines of code and it was a great experience!
So I did a training to become a developer and then join my team today.

"Experience is the name everyone gives to their mistakes."

● Motivations

- Success the project
- Learning skill
- Money

● Characteristics

● Social Networks

- Facebook
